

RoHS Compliance Form

Reference: Compliance with the European Union Restriction of the use of certain Hazardous Substances (RoHS) directives: 2002/95/EC, 2002/96/EC, 2003/11/EC, which require products including components and assemblies placed on the market after July 1, 2006 to be free of the below listed substances that are in concentrations greater than 0.1% by mass (1,000 ppm). Cadmium (CrVI) concentration limit to be not greater than 0.01% (100 ppm).

Formulation: TYGON® R-3603

Date Issued: 14 JULY 2005

The undersigned authorized representative of Saint-Gobain Performance Plastics hereby certifies that the following materials or substances are not, and will not be used in the manufacture of; intentionally added to; or contained in the above subject formulation:

Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent Chromium (CrVI), and two Bromine containing Flame Retardants – PBB (Polybrominated Biphenyls) and PBDE (Polybrominated Diphenyl Ethers including Pentabromodiphenyl Ether, Octabromodiphenyl Ether).

In addition, we would not expect the total of these materials to exceed 100 ppm (0.01% by mass), but do not have a test report of material analysis documenting this statement on file at this time.

As an authorized representative of my company, I certify that the information provided above is true and the appropriate documentation is available to substantiate this legal statement.
