

COMBINED WEATHER SENSOR "WENTO-IND"

Wind parameters · air temperature · relative humidity · barometric pressure · dew point / 6 parameters and optional precipitation!

Unique all-rounder...

the new generation of a professional, particularly compact weather station for universal application! Measurement of 6 meteorological parameters and the precipitation quantity (optional), and that at an optimum price-performance ratio. The wind sensors and the integrated weather module have a very robust design. High-quality special alloys make this weather station environmentally resistant and extremely stress resistant. Reliable measurement of meteorological parameters is ensured even under extreme weather conditions.

- extremely robust and compact
- reliable year-round operation in all climate zones
- simple and rapid mounting
- serial interface for direct connection to PC technology
