Leica DM750

The New Generations Choice of Innovative Educational Microscopes

Living up to Life

Leica
MICROSYSTEMS

Made for Future Nobel Prize Winners

Science Teaching Revitalized

The more time the instructor has to teach, the more students can learn. The Leica DM500 and DM750 microscopes were specifically developed to revitalize science teaching and to achieve the goal of more hands-on time for Life science courses. With many student-friendly features and high-quality construction, the Leica DM500 and DM750 invigorate science learning and teach the next generation of scientists effectively and efficiently.

Superb Optics

- Based on the same optical platform as Leica Microsystems' research microscope line, students enjoy outstanding optical performance with full access to virtually all accessories from the Leica Microsystems microscope product line.
- NEW! 100× dry (no oil needed) objective provides very high resolution (N.A. 0.8) while eliminating the oil.

EZStore™

- Integrated vertical handle provides easy carrying and easy lifting when storing on high shelves; undercut on front of stand works in combination with the handle for safer, two-handed carrying.
- Integrated cord wrap eliminates damage to microscope components from improper cord wrapping; vertical cord insertion prevents the cord from pulling partially out of the stand while in storage or in use.
- The unique shape of the microscope stand protects controls from damage when microscopes are stored side-by-side.

EZGuide™

- Student friendly slide holder to prevent slide chipping.

EZLite™

- LED illumination provides cool, white light with a lifetime of over 20 years average use. No longer need to change lamps during lab time and save the expense of replacement lamps.
- The cost-savings pays for several microscopes over their lifetimes.

SafeTStage™

- Microscope stage maintains its dimension, which eliminates the chance of injury from contact with a conventional stage rack.
- Rounded edges are easy on the skin.

AgTreat™

- The spread of disease from surfaces is of great concern, especially in educational environments. Leica Microsystems has integrated an additive so that all microscope touchpoints are treated to inhibit the growth of bacteria. This helps to prevent the spread of disease via the microscope surfaces and leads to a healthier laboratory environment.

DM500 – Science Teaching Made Easy

The Leica DM500 is ideal for first level Life Science courses. The microscope's stand features provide "plug and play" capability. All students need to do is turn the power on, place the specimen slide on the stage, focus, and enjoy the view!

Ready to work

- Pre-centered, pre-focused Abbe condenser eliminates the need for adjustments

EZTube™

- Eyepieces integrated with the eyetubes to prevent loss
- Preset diopter adjustments eliminating the opportunity to incorrectly set diopters
- Other viewing tubes are also available

Safe Rotation

- Patented captive thumb-screw for safe rotation of the EZTube™

All in one

- Abbe Condenser slot for phase contrast and darkfield sliders, including patented 4 position phase slider which offers brightfield and phase capabilities all in one slider

Perfect light

- LED illumination designed to provide even lighting across the full field of view without adjustments
- Also available with a rechargeable battery powered stand for field use

DM750 – Science Teaching for a New Generation

The Leica DM750 is designed specifically for the versatile needs of advanced Life Science courses as well as for professional training such as medical, veterinary, and dental schools.

Versatile possibilities

- Standard condenser for magnifications 4× – 100×
- Phase turret condenser for brightfield and phase contrast
- Flip top condenser for low magnifications
- The DM750 is available with a 4 position or 5 position nosepiece

Wear resistant

- Special stage finish offers additional protection from friction damage

Energy saving

- Patented time delay shutoff saves energy by automatically turning off the illumination after 2 hours of no use

A+ focus, contrast & illumination

- Weighted focus knobs provide inertia and extremely accurate focus capability
- Koehler field diaphragm available as an option for optimum illumination and contrast

Shared viewing made easy

- Variety of viewing tubes provide free rotation while securely fixed to the stand
- Standard viewing tubes with eyepiece locking screws to prevent loss of eyepieces

Go High Definition!

The ability to share, capture, and archive images is an important part of the microscopy laboratory. Now available: the full range of Leica Microsystems imaging solutions, including the one-of-a-kind Leica ICC50 HD digital camera module.

Leica ICC50 HD Camera Module – Integrated and Modular

- Fast, high-resolution (up to 1920 × 1080) live image on an HD display for scanning slides, observing moving specimens, and viewing the finest details on large screens
- Direct connection to an HD display
- Capture images and movie clips on an SD card for easy portability of the system
- Control the camera functions via two onboard buttons for easy access
- Optional handheld remote for fine tuning the image, customizing camera settings, and viewing a gallery of images and movie clips from the SD Card for easy playback
- Includes Leica Application Suite (LAS) EZ software for easy camera control, image capture, annotation, measurement and documentation.
NEW: Free hand annotation is now available on the live and saved image!
- Compatible with a wide selection of optional Leica Microsystems software modules.
- The modular design of the system allows easy upgrades and service.

A variety of trinocular viewing tubes and C-mount adapters provide the versatility to use stand-alone cameras; including the economical Leica EC3 digital camera, which opens the door to unlimited imaging possibilities.

System diagram Leica DM500 / DM750

- Replacements**
- 13 613 563 Eyeguard pair
 - 13 RFAG30003 Fuses for DM500, DM750
 - 13 613 571 Thumbscrew pair for DM750 condenser mount
 - 13 613 572 Set screw pair for DM750 condenser mount
 - 13 613 584 Dust cover DM500, DM750
 - 13 613 210-100 DM500 User documents
 - 13 613 510-100 DM750 User documents
 - 13 613 725-100 ICC50 HD User documents
 - 13 613 573 Add on lens for condensers with DM750 (included with stand)
 - 11 505 249 Rechargeable battery set

- Analyzer Module Sliders**
- 11 555 045 Fixed analyzer slider
 - 11 555 079 180° Rotatable analyzer slider
 - 11 555 080 360° Rotatable analyzer slider

- Others**
- 13 613 262 Captive thumbscrew for EZ tube
 - 13 613 261 Rubber grips for X/Y controls
 - 13 614 800 Immersion oil
 - 11 513 106 Stage micrometer
 - 11 505 091 Diffuser slider for using 2.5x objective with Abbe condenser
 - 11 505 507 Auxilliary lens for using 2.5x objective with 11 501 183 flip top condenser
 - 13 613 566 32 mm filter holder
 - 13 613 263 Hard carrying case
 - 10 450 245 Soft carrying case
 - 13 613 562 Simple pol kit
 - 11 505 250 Solar panel

Dimensions Leica DM500 / DM750

Dimensions in mm/inch

Leica DM500 / Leica DM750 – Specifications

	DM500	DM750
SEPARATE EYEPIECES		
High eyepoint	X	X
10×/20 (20 mm field of view)	X	X
Available with or without pointer	X	X
Available fixed or focusing	X	X
Focusing eyepieces with reticule holder for 24.5 mm reticle	X	X
Foldable eyeguards	X	X
30 mm mounting diameter	X	X
EZTube™		
Preset diopters for corrected vision	X	X
45 degree viewing angle	X	X
10×/18 (18 mm field of view)	X	X
Attaches to stand with set screw	X	X
Captive thumbscrew available for safe rotation	X	X
Eyepieces are integrated into tube	X	X
Available with pointer and without pointer	X	X
Interpupillary distance range 52 mm – 75 mm	X	X
Other Viewing Tubes for separate eyepieces		
45 degree, 30 degree, trinocular	X	X
Maximum field of view 20 mm	X	X
Rotatable dovetail	X	X
Leica tube dovetail standard	X	X
Eyepiece locking screw	X	X
Interpupillary distance range 52 mm – 75 mm	X	X
Stand		
Stand shape protects controls	X	X
Stand construction – die-cast aluminium	X	X
External fuses	X	X
Knurled nosepiece	X	X
4 position nosepiece only	X	
4 or 5 position nosepiece available		X
Drop in holder for 32 mm mounted or not mounted filters	X	X
EZStore™		
Vertical handle	X	X
Undercut in front of stand	X	X
Cord wrap	X	X
Vertical cord attachment to stand	X	X
Objectives		
Infinity platform	X	X
Plan optics for FOV 18	X	X
HI Plan for FOV 20	X	X
100× dry objective with N.A. 0.8 (no correction collar)	X	X
Objective labeling laser engraved (HI Plans)	X	X
M25 nosepiece thread	X	X
EZGuide™		
One-handed slide loading	X	X
26 mm × 76 mm stage travel	X	X

	DM500	DM750
SafeTStage™		
Stage surface 185 mm (150 mm front) wide × 140 mm deep	X	X
Rounded stage edges	X	X
Non extending rack	X	X
Verniers for X/Y coordinates	X	X
Wear resistant stage surface	X	X
Condenser		
Prefocused and precentered Abbe condenser	X	
Centerable and focusable condenser mount		X
Slot in condenser for contrast sliders (phase, darkfield, compensator)	X	X
Magnification labels on condenser	X	X
Standard Leica condenser mount for condensers (Abbe, turret, flip top, etc.)		X
Focus		
Low position focus controls	X	X
Self adjusting focus mechanism	X	X
300 microns per fine focus rotation	X	X
Calibrated in 3 micron increments	X	X
Weighted focus knobs		X
EZLite™		
Preset field aperture only	X	
Available with or without adjustable Koehler field diaphragm		X
LED illumination – 6000 K temp, 25,000 h life at full intensity	X	X
Continuous intensity adjustment	X	X
Illumination enough for viewing at lowest intensity	X	X
Simple polarizing kit available	X	X
2 hour Auto Off (can be disabled or enabled)		X
Auto Off default: 4 hole stands enabled, 5 hole stands disabled		X
Imaging		
Trinocular tubes available (50%/50% light split)	X	X
C mount adapters with standard Leica mount	X	X
ICC50 HD intermediate camera module (50%/50% light split)	X	X
Intermediate Modules		
35 mm intermediate ergo module available	X	X
15 mm flat top module	X	X
Module for LSF reflected light illuminator	X	X
Analyzer module	X	X
AgTreat™		
Anti microbial treatment	X	X
Certifications		
cULus, CE, RoHS		
Shipping		
Dimensions: 40 cm × 37 cm × 39 cm		
Weight: 9 kg	X	X

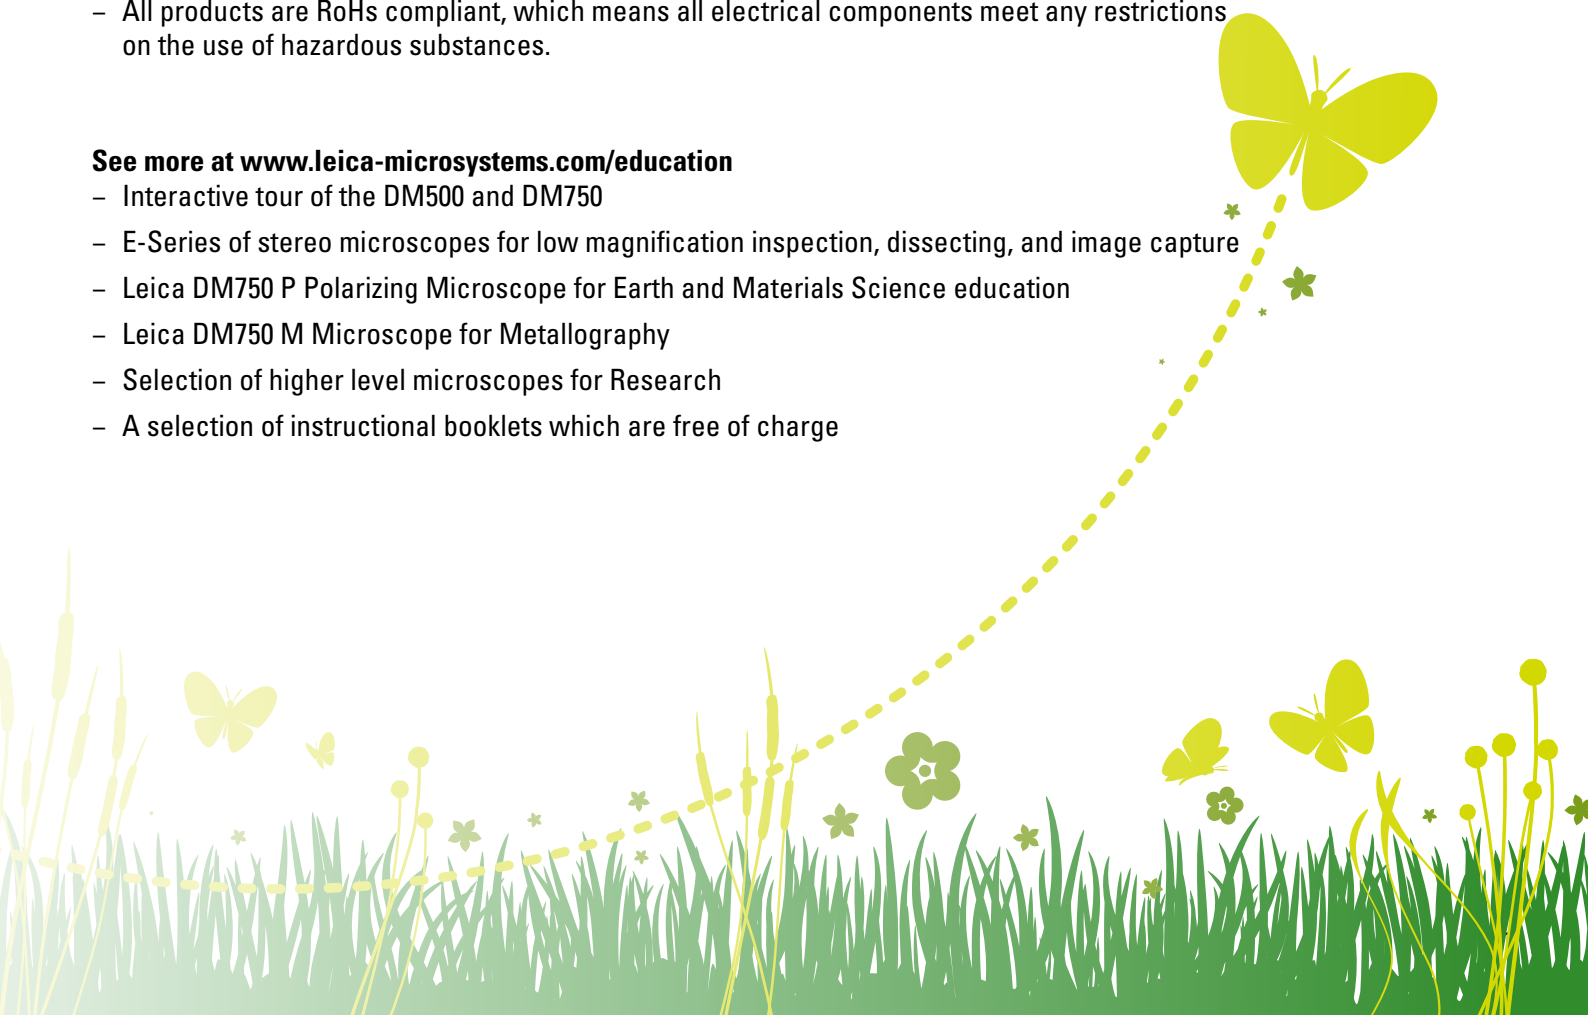

Clean and Green

We actively implement ways to make our environment cleaner and safer for this generation and the next:

- All packaging is completely recyclable.
- No Lead content in any of the glass components.
- LED illumination consumes approximately 80% less energy than standard halogen illumination.
- The time delay shutoff feature found on the Leica DM750 ensures no energy is wasted.
- Constantly optimizing our logistics chain to keep the CO₂ footprint as low as possible.
- AgTreat™ helps to prevent the spread of disease via the microscope surfaces and leads to a healthier laboratory environment.
- All products have been tested by independent safety laboratories and carry the cULus and CE mark to indicate their design for safety.
- All products are RoHs compliant, which means all electrical components meet any restrictions on the use of hazardous substances.

“With the user, for the user”

Leica Microsystems

Leica Microsystems operates globally in four divisions, where we rank with the market leaders.

• Life Science Division

The Leica Microsystems Life Science Division supports the imaging needs of the scientific community with advanced innovation and technical expertise for the visualization, measurement, and analysis of microstructures. Our strong focus on understanding scientific applications puts Leica Microsystems' customers at the leading edge of science.

• Industry Division

The Leica Microsystems Industry Division's focus is to support customers' pursuit of the highest quality end result. Leica Microsystems provide the best and most innovative imaging systems to see, measure, and analyze the microstructures in routine and research industrial applications, materials science, quality control, forensic science investigation, and educational applications.

• Biosystems Division

The Leica Microsystems Biosystems Division brings histopathology labs and researchers the highest-quality, most comprehensive product range. From patient to pathologist, the range includes the ideal product for each histology step and high-productivity workflow solutions for the entire lab. With complete histology systems featuring innovative automation and Novocastra™ reagents, Leica Microsystems creates better patient care through rapid turnaround, diagnostic confidence, and close customer collaboration.

• Medical Division

The Leica Microsystems Medical Division's focus is to partner with and support surgeons and their care of patients with the highest-quality, most innovative surgical microscope technology today and into the future.

The statement by Ernst Leitz in 1907, “with the user, for the user,” describes the fruitful collaboration with end users and driving force of innovation at Leica Microsystems. We have developed five brand values to live up to this tradition: Pioneering, High-end Quality, Team Spirit, Dedication to Science, and Continuous Improvement. For us, living up to these values means: **Living up to Life.**

and representatives in more than 100 countries

In accordance with the ISO 9001 certificate, Leica Microsystems (Switzerland) Ltd, Industry Division, has at its disposal a management system that meets the requirements of the international standard for quality management. In addition, production meets the requirements of the international standard ISO 14001 for environmental management.
