

SoccerLAB is a centralized information and management system to support the complete technical staff. It combines several software applications, hardware and services in one solution. SoccerLAB is mainly build out of web applications. This means the system is accessible from any browser on Windows or Apple pc's without installing complex applications.

A powerful user management and security system makes it possible for users to work together on the same database. By setting the correct privileges users can only see what they are allowed to see. Each department within the organization can work in a secure way on their own sensitive data.

- CLUB AND MANAGEMENT**
- TECHNICAL DIRECTOR**
- HEAD COACH**
