## Cell Culture System

### Biological Stirrers and Culture Vessels

The cell culture system from Techne® offers the ideal environment for the growth of suspension cells. The combination of the magnetic stirrer and the glass culture vessels ensures excellent growth conditions and high cell viability

# Cell Culture System

## Biological Stirrers

The stirrers are designed for optimal suspension cell culture and the use of microcarriers. A system comprises of a stirrer platform and a number of glass culture vessels.

- Five stirrer platform sizes are available, along with 4 sizes of culture vessel
- Speed range from 0 to 80rpm
- Softstart/stop for slow acceleration and deceleration
- Interval setting option
- Stainless steel stirrer platform with locators for the culture vessels
- Designed for incubator environments up to 40°C and 95% humidity

### Unique stirring action

The culture vessels incorporate a unique base design which, together with the bulb-ended stirrer, ensures that the cells are lifted into suspension at the lowest possible speeds. This gentle stirring action promotes high cell yields by preventing cell shearing.

The stirrers create virtually no heat so there is negligible heat transfer from the magnetic drive to the culture vessel, making the system suitable for use in both incubators and cold rooms.

### Calibrated speed control and interval stirring

Cell attachment to microcarriers and high cell yields are ensured by the special softstart/stop design and interval stirring option. The former ensures slow acceleration and deceleration of the stirrer, avoiding excessive turbulence in the culture media and eliminating cell damage. The interval stirring can be used during the attachment phase to further reduce agitation of the media or when culturing particularly fragile cells.

## MCS-101L

- Accommodates one 3 or 5 litre culture vessel
- Strong, rugged and lightweight

## MCS-102L

- Holds up to two 1 litre culture vessels
- Small, light and compact and space saving

## MCS-104S

- Hold up to four 500ml culture vessels
- Small, light, compact and space saving

## MCS-104L

- Holds up to four 1 litre culture vessels
- Strong, rugged and lightweight

## MCS-104XL

- Accommodates four 5 litre culture vessels
- Designed for large-scale production
- Strong, rugged and lightweight

## Biological Stirrers

### Technical Specification

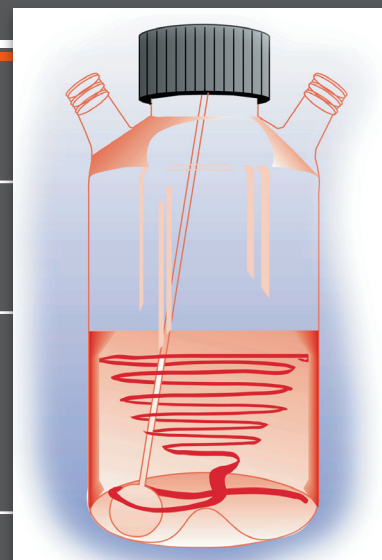

#### All models

#### Speed

Speed range	0 to 80rpm
Speed setting accuracy	<± 3rpm
Softstart speed control	20 second acceleration 20 second deceleration

#### Interval stirring

Variable on-time	6 seconds to 5 minutes
Variable off-time	2 minutes to 2 hours
Limited operating conditions	40°C and 95% relative humidity (non-condensing)
Voltage	Dual Voltage 230/110V 50/60Hz
Nominal power consumption	2W

Unique Stirring Action

### Technical Specification

#### Unique to each model

	MCS-101L	MCS-102L	MCS-104S
Vessels per system	1	2	4
Maximum vessels size (ml)	5000 (3000 min.)	1000	500
Dimensions (L x W x H), mm	495 x 395 x 90	400 x 140 x 90	365 x 250 x 90
Net weight, excluding vessels, kg	6.5	3.0	4.1
Shipping weight, kg	7.5	4.2	5.3

	MCS-104L	MCS-104XL
Vessels per system	4	4
Maximum vessels size (ml)	1000	5000 (only)
Dimensions (L x W x H), mm	495 x 395 x 90	595 x 530 x 90
Net weight, excluding vessels, kg	6.1	11.5
Shipping weight, kg	7.1	13.5

### Ordering Information

Description	Product codes

MCS-104XL biological stirrer	FMCS104X

# Cell Culture System

## Glass Culture Vessels

The culture vessels can be sealed for use with pathogenic materials. The stirrer rod design eliminates rotating bearings within the culture vessels, avoiding the difficulties arising from attempts to clean and autoclave conventional vessels. The stirring system uses Pyrex® borosilicate glass culture vessels and stirrer rods which are siliconised to reduce the possibility of cells attaching to and growing on the surfaces. Vessels are available with nominal working volumes of 125ml, 250ml, 500ml, 1 litre. Note that you must order culture vessels to suit your needs; they are not supplied with the MCS platform.

## Technical Specification

	125ml	250ml	500ml	1 litre
Filled volume, (ml)	250	500	1000	2000
Nominal working volume, (ml)	125	250	500	1000
Working volume range, (ml)	50 –175	100 –350	200 – 700	500 –1500
Height, (mm)	145	170	205	263
Diameter, (mm)	65	80	100	140
Port size (mm)	14	14	23	33
No. of side necks	2	2	2	2
