Multiplex bioreactor/fermenter-FR-P series

FR-P系列是采用一套自控系统来控制多套反应器系统的解决方案，多合一的组合设计既节约了设备所需空间，又提供了灵活的实验设计同时保证了多台罐体的平行性，为您提供工艺开发和小规模样品生产的理想工具。

The FR-P series is a solution that uses a single automatic control system to control multiple reactor systems. The multi-in-one combination design not only saves the space required by the equipment, but also provides flexible experimental design and ensures the parallelism of multiple tanks, providing you with the ideal tool for process development and small-scale sample production.

在使用过程中，多套罐体可同时使用也可分开作为独立的培养设备使用。支持相同体积罐体培养，也可自由组合不同体积罐体，用于大小和功能完全不同的多个设备的同时培养不同的生物产品。

扩展功能：可增加移植策略，搭配小体积罐体作为种子罐，大体积罐体做为生产罐。

In the process of use, multiple sets of tanks can be used at the same time or can be separated as independent cultivation equipment. It supports the same volume tank culture, and can also be freely combined with different volume tanks for the simultaneous cultivation of different biological products in multiple devices with completely different sizes and functions.

Expansion function: can increase the seed transfer strategy, with a small volume tank as a seed tank and a large volume tank as a production tank.

在线葡萄糖/乳酸传感器

Online glucose/lactic acid sensor

C-CIT在线葡萄糖/乳酸传感器系列产品是一种基于酶电化学原理的传感器系统，用于对细胞系、培养基和工艺开发项目过程中连续在线监测葡萄糖和乳酸。该传感器系统可在一定的时间（21天）范围内显示细胞培养的相关生长行为和代谢状态。数据生成频率为20秒/次，全天观察您的细胞培养状态。也可直接与OPC服务器连接，通过葡萄糖消耗和乳酸生成的在线监测来实现过程反馈控制。

The C-CIT Online Glucose/lactic Acid sensor family is a sensor system based on the principle of enzyme electrochemistry for continuous online monitoring of glucose and lactic acid during cell lines, media and process development projects.

The sensor system can display the relevant growth behavior and metabolic state of the cell culture over a certain time range (21 days). Data is generated at a frequency of 20 seconds/time, and your cell culture status is observed throughout the day. It is also possible to connect directly to the OPC server for process feedback control through on-line monitoring of glucose consumption and lactic acid production.
