## Absolute pressure...

is measured inside the cost effective, practical and robust standard housing. The technical design makes the measuring range changeover on site as well as the choice of the output signal possible.
The universally applicable sensor is the proper solution for price conscious customers. It distinguishes itself by its low maintenance and easy operation.

- cost effective
- OEM variant with 3 modes of operation
- applicable with/ on data loggers in energy-saving mode (e. g. solar operation)
- 1 instrument with 2 ranges of pressure measurement and 3 standard outputs - adjustable
