

## Overview

FKOP and FKOE series is low-cost flow meter for liquids and gases based on orifice principle.

FKOP series combines a variable area flow meter (rotameter) and orifice flow meter principles. A small sized glass-tube or metal-tube variable area flow meter (rotameter) is attached to the meter tube that has an orifice on the inside. So, it's a combination of orifice flow meter and variable area flow meter (rotameter). The main components of this series are meter body with orifice, connection, taper tube (glass or metal tube), float, isolating valve and options.

FKOE series combines a dP (differential pressure) indicator/transmitter and orifice meter body and comes with versatile computation and analog and digital output options.

The meter is installed in line with pipe using flange, screw or wafer (sandwich type) connections.

The material of the meter can be stainless steel, PVC, Teflon-lined, all Teflon, etc. to meet to resistance requirements to various chemical and physical properties of liquids or gases.

The meter body can be installed freely both horizontally and vertically. So, it's easy to adapt to the tough site environments.

Isolation valves are installed between the meter body and the indicator, so that there's no need to install by-pass piping for maintenance and repair of the meter and it also saves the total cost of purchasing and installing the meter.

The meter comes with various options for controlling of the process such as Reed switches.

## Main Features

### Low Cost & High Performance

Thanks to unique orifice by-pass system, total instrumentation cost is saved especially for medium and large sized piping

### Compact Design

Small sized indicator saves space in plants.

### Easy Installation

Screw, Flange or Wafer can be used to install the meter in line. There's no need for by-pass piping for repair and maintenance.

### For All Flow Directions

Bottom-Top, Top-Bottom, Left-Right and Right-Left flow direction. Change of flow direction is possible even after installation.

### Alarm Contact

Besides local flow indication, alarm contact (s) are available. Thus it can be used as Flow Switch.

### Easy Maintenance

Simple design and limited number of parts saves maintenance workload.

### High Anti-Corrosive Capability

Carbon steel, stainless steel and PVC (CPVC) versions are available for various corrosive fluid applications.

# Orifice Flow Meter (Series FKOP/FKOE)

**FKOP-C**

**FKOP-F**

**FKOE**

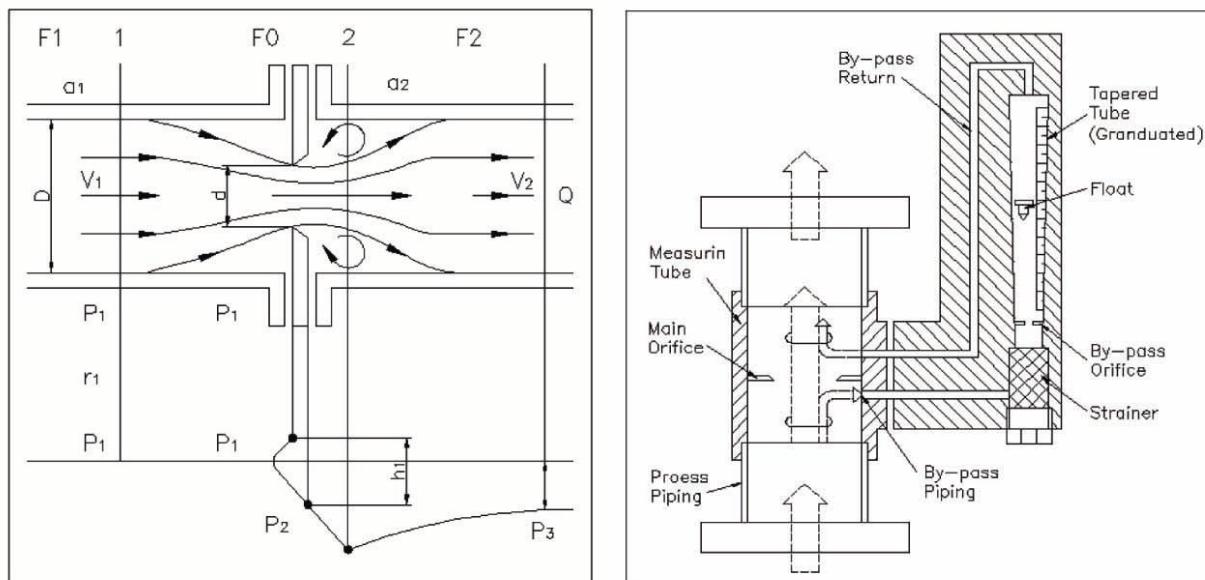

**FKOP-N**

## Operation Principle

As shown in the figure, because liquid or gas stream inside the pipe is restricted or throttled by reducing the section area of the pipe using orifice plate, a differential pressure is generated across this orifice plate, meaning the pressure immediately downstream of the orifice is lower than that immediately upstream. The difference of pressures upstream and downstream ( $dP$ , differential pressure) corresponds to the flow rate based on Bernoulli's continuity principle. The flow rate thus can be calculated based on this differential pressure.

In FKOP series (except for FKOP-DP series that measures differential pressure directly using manometer), this differential pressure thus generated is converted to flow rate using variable area flow meter. The inlet (bottom) and outlet (top) of the indicator (variable area flow meter) are connected to taps placed immediately upstream and downstream of the meter body. When the fluid flows through this orifice, due to the differential pressure, the fluids flows out into the inlet of the variable area flow meter, through the tapered-tube and float, out of the outlet and back into the main stream. The fluid flowing through the tapered-tube floats the float, the height of which corresponds to the flow rate of the main stream. (For more information, please see the principle of variable area flow meters in our FKA (glass-tube) and FKM (metal-tube) series catalogs.)

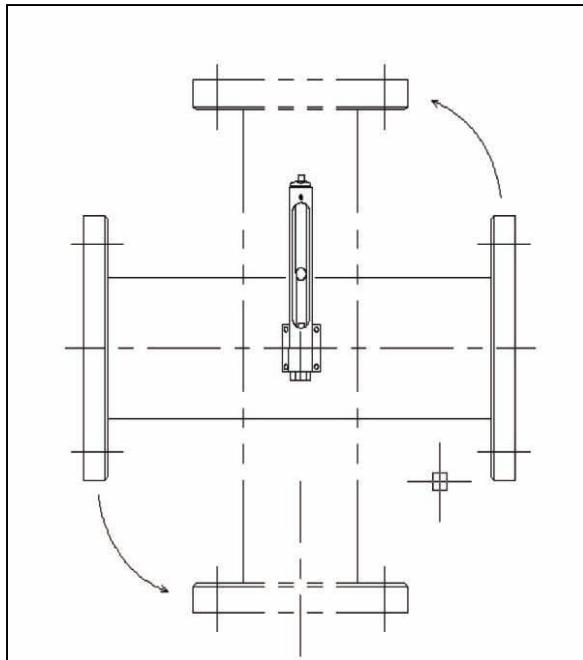

The flow rate is engraved on the indicator scale and by reading the float position on the scale, the flow rate can be read.

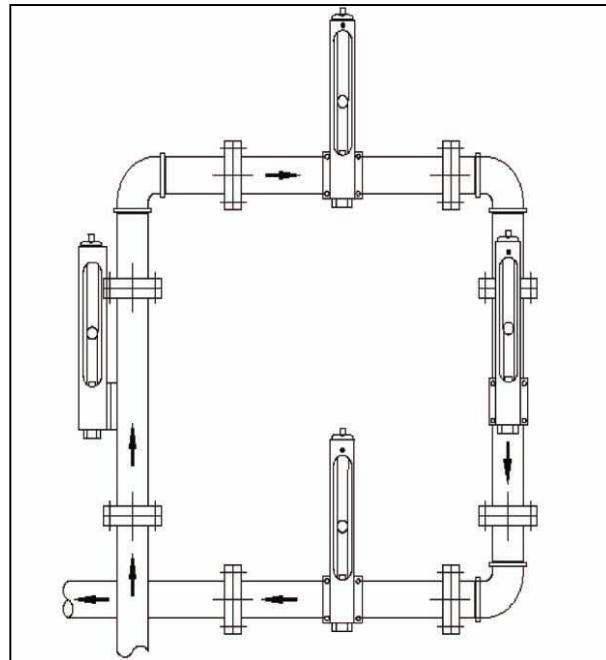

## Applications

- Hot and cold water as well as air flow measurement in air conditioning
- Medium and large line measurement in general process industry
- Cooling water lines
- Water treatment process
- Pure and ultra-pure water production facilities
- Testing of fire fighting pumps
- Testing of blowers
- Etc.

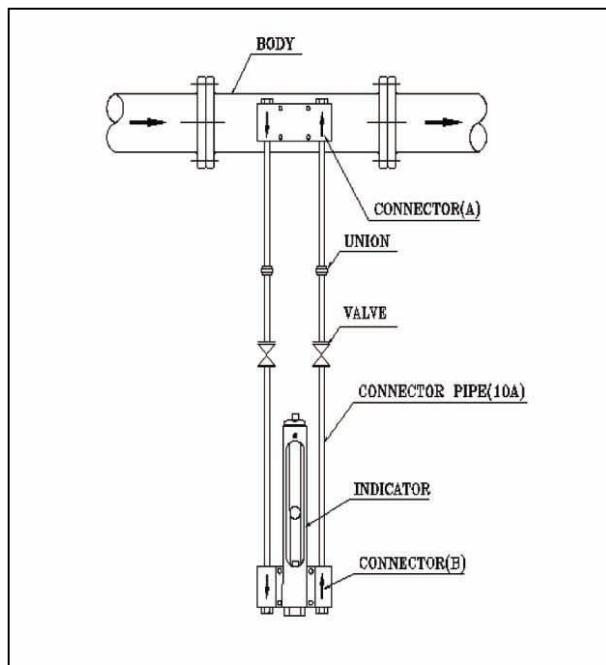

## Installation

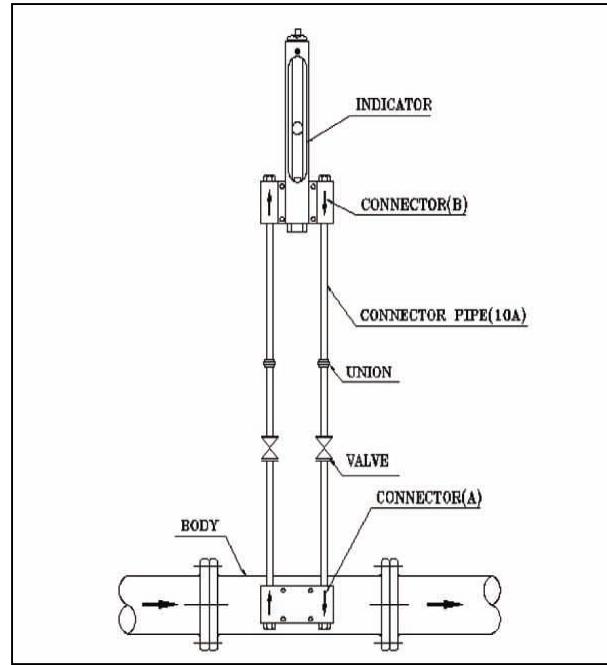

The meter can be installed either on a horizontal or vertical lines freely.

The meter can be installed for all flow directions bottom to top, top to bottom, left to right and right to left.

The indicator of the meter can be remotely mounted using impulse line. (In the above, the indicator is below the pipeline.)

The indicator of the meter can be remotely mounted using impulse line. (In the above, the indicator is above the pipeline.)

## Model Overview

Model Code	Description	Remarks
<b>FKOP</b>	Combines variable area flow meter with orifice meter body	Indicator: Glass-tube variable area flow meter <i>(For detailed technical options of the indicator, please refer to our catalog for glass-tube rotameter series, FKV.)</i>
<b>FKOP-CK</b>	FKOP series with impulse line for remote indication.	
<b>FKOP-FKMS</b>	Combines variable area flow meter with orifice meter body	Indicator: Metal-tube variable area flow meter <i>(For detailed technical options of the indicator, please refer to our catalog for metal-tube rotameter series, FKMS.)</i>
<b>FKOP-CKM</b>	FKOP-FKMS series with impulse line for remote indication	
<b>FKOP-DP</b>	FKOP series with manometer for indication of dP (differential pressure) instead of variable area flow meter	The scale can be with flow or manometer.
<b>FKOP-R</b>	FKOP series for fire pumps	Suitable for measuring high-pressure and high-velocity flows.
<b>FKOE</b>	Orifice flow transmitter with digital display	Measures differential pressure, converts it to flow and processes it for display and analog/digital output.

## General Specifications

<b>Measurement Principle</b>	Differential Pressure
<b>Media Measured</b>	Liquid, Gas, Steam
<b>Turndown Ratio</b>	5:1
<b>Body &amp; Connection Materials</b>	SS41, SUS304, SUS316, SUS316L, PVC, HT-PVC, CPVC, Teflon-Lined, All Teflon, etc.
<b>Enclosure</b>	IP-65 (Nema-4x, weather proof)
<b>Outputs</b>	4-20mA, Reed Switch, etc.

**Scope of Supply**

No	Part	Material		
		Class 1	Class 2	Class 3
1	Main Pipe	Customer's Scope of Supply		
2	Orifice Flange			
3	Flange Gasket			
4	Main Orifice	SUS304	SUS304	SUS316
5	Orifice Ring	SS400	SUS304	SUS316
6	Ball Valve	BsBFE2	SCS13A	SCS14A
7	Bypass Piping	SGP or STGP	SUS304	SUS316
8	Bypass Orifice	SUS304	SUS304	SUS316
9	Gasket	For Liquids: Non-Asbestos For Gases: NBR or Viton		
10	Indicator	SCS13/S S400	SCS13/S US304	SCS14/S US316

Notes:

Gaskets between main pipe orifice (or orifice ring) and piping flanges as well as bolts and nuts for installation are customer's scope of supply unless otherwise specified.

## FKOP-DP Series (Orifice Meter with dP (differential pressure) Indicator Option)

FKOP-DP-FI

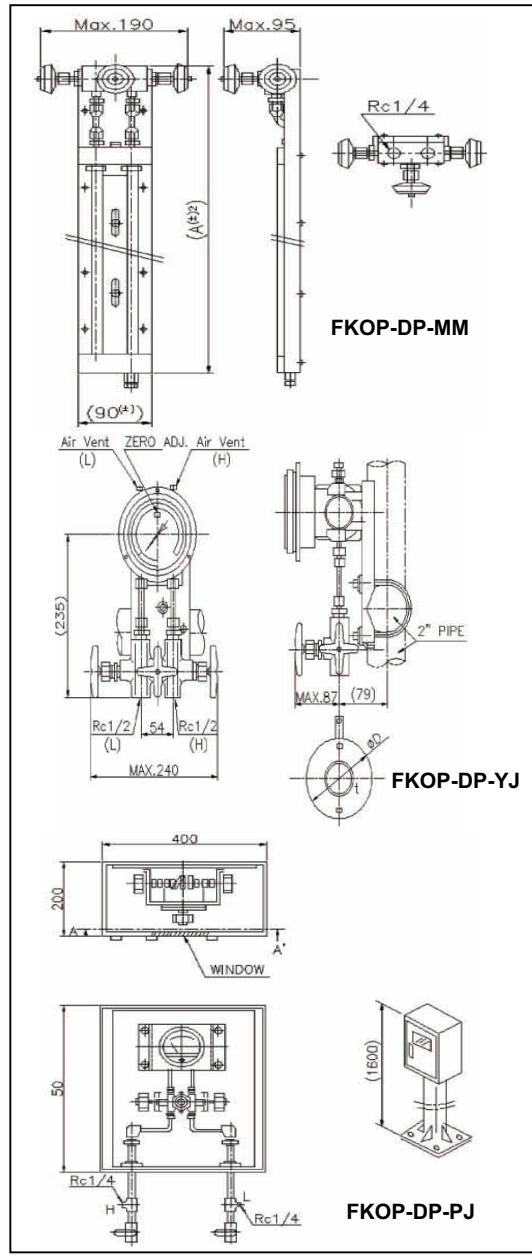

FKOP-DP-FI-YJ

FKOP-DP-YJ

Model Selection Guide		
FKOP-DP	Description	Code
Indicator	Flow Indicator	FI
	Manometer Indicator	MM
	Ø150 Dial Indicator	YJ
	Ø100 Dial Indicator	MJ
	Remote Panel Indicator	PJ
Material	SUS304	B
	SUS316	C
	SUS316L	D
Option	Cock Valve	B
	3-Way Valve	Y
	1-Point Contact	R1
	2-Point Contact	R2

## Installations

## Main Specifications

Line Sizes	10A ~ 500A (Above this size, optional)
Fluid	Liquids and Gases
Flange	JIS, ANSI, DIN, etc.
Temperature	-5°C ~ 100°C
Pressure	20 KgF/cm² (above this available as option)
Material	Body & Flange – SUS304, SUS316, SUS316L, SS41 Indicator Housing – SUS304 3-way Valve – SUS304
Accuracy	±2%, F.S

Note:  
For detailed technical options of the indicator, please refer to our catalog for metal tube rotameter series, FKMS.

## FKOP-R Series (Orifice Meter for Fire Pumps)

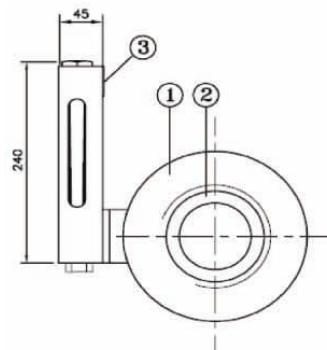

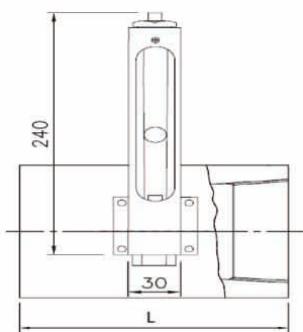

Flow Rate and Size Table

Size	25A	32A	40A	50A	65A	80A	100A	125A	150A
Flow Rate (L/min)	35 ~ 180	70 ~ 360	110 ~ 550	220 ~ 1100	450 ~ 2200	700 ~ 3300	900 ~ 4500	1200 ~ 6000	2000 ~ 10000
Resolution (L/min)	5	10	10	20	50	100	100		
Length (L)	N	70	74	85	90	100	100	120	
	F	520	520	520	520	540	540	540	540

N - Screw Connection  
F - Flange Connection

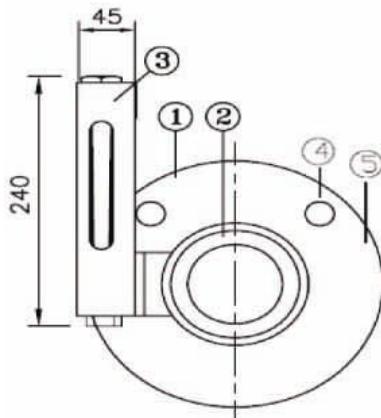

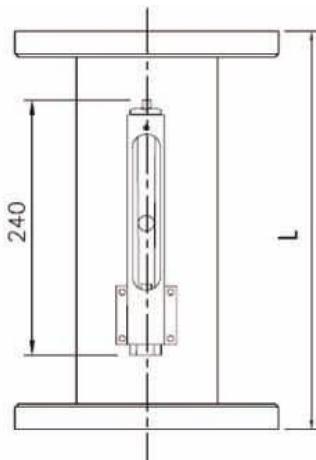

### FKOP-R-N

Dimensions and Weights based on SUS304

Size	L (mm)	Weight (Kg)
25A	70	2.5
32A	74	3
40A	85	3.5
50A	90	4
65A	100	5
80A	110	6
100A	120	8

### FKOP-R-F

Dimensions and Weights based on SUS304

Size	L (mm)	Weight (Kg)	Size	L (mm)	Weight (Kg)
25A	520	6	150A	540	25
32A	520	7	200A	540	35
40A	520	8	250A	540	50
50A	520	10	300A	540	63
65A	540	12	350A	540	80
80A	540	13	400A	540	95
100A	540	16	450A	540	120
125A	540	23	500A	540	130

## FKOE Series (Orifice Flow Transmitter)

FKOE-BG-F-2-T

FKOE-BS-F-2-TR

### Model Selection Guide

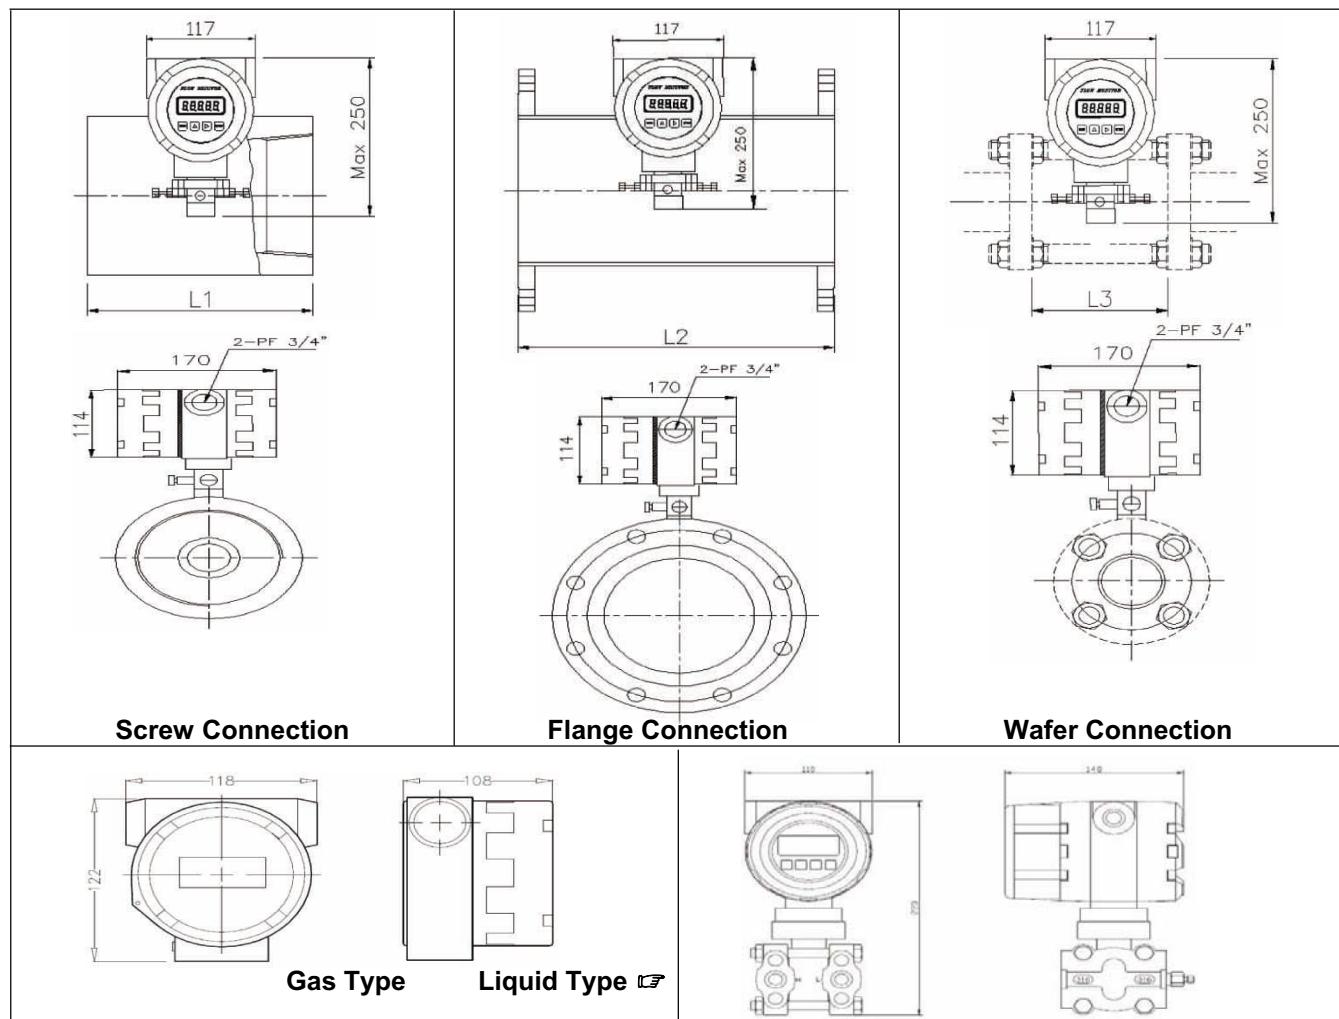

FKOE	Description	Code
Fluid	Gas	BG
	Liquid	BL
	Steam	BS
Connection	Flange	F
	Screw	N
	Wafer	C
Material	SS41	1
	SUS304	2
	SUS316	3
	SUS316L	4
Option	LCD Display (Flow Rate & Total), 4-20mA, Pulse Output	T
	LCD Display (Flow Rate only), 4-20mA, Pulse Output, RS-485	TR
	Cock Valve	B
	3-Way Valve	Y

### Main Specifications

General	Performance	Transmitter
dP Range: 0 ~ 10000 mmH2O Line Pressure: 35 barg	Linearity: ±0.5%, F.S Repeatability: ±0.1%, F.S Hysteresis: ±0.5%, F.S Thermal Effect: ±0.5%, F.S Accuracy: ±1.0%, Reading	Display: 2 line, 6-digit LCD (Flow Rate & Total) Ambient Temperature: 0 °C ~ 60 °C Output: 4-20mA, Pulse, RS-485
