Water Jacket / Penguin AQ

CO₂ Incubator

APC-30DR/APC-50DR

Tri-Gas Incubator

APM-30DR/APM-50DR

The Smallest Water Jacket Incubator in the World with a state-of-the-art, reliable and stable CO₂ and Temperature control.

1. Precise Temperature Control

Water Jacket Chamber provides exceptionally stable and accurate temperature control.

2. Chamber Size

The small chamber allows for fast temperature and gas concentration recovery. Its reduced size allows culturing a reduced number of patients (dishes) in the incubator including the dedication of an entire shelf or incubator per IVF patient (Personal incubation).

3. Automatic Maintenance

Easy set-up with Automatic Set-Up Function. Penguin AQ also offers Automatic ZERO Calibration on CO₂ Concentration every 10 days (can be programmed with a customized interval).

4. User-Friendly

All the interiors can be removed without any tools for easy cleaning. The chamber construction includes rounded corners helping the cleaning and disinfection process.

The photo shown is equipped with optional OCC-30D and AP-100.

5. Adaptable to your needs

The Penguin AQ AP Series include two different chamber sizes and two gas configurations (CO₂ or Tri-Gas) adapting to your IVF culture needs.

6. Versatile

Access port (30mm / 1.3") is available for 57L (2.0cf) models as standard feature (available as an option for 32L models).

7. Tri-gas, Low-Oxygen Concentration

APM-30DR and APM-50DR models offer oxygen control for standard IVF or for extended embryo culture to blastocyst stage.

8. Dependable

Each Penguin AQ incubator includes an alarm system for: water level in the water jacket, CO₂, O₂ (in APM models) and temperature. Each incubator is equipped with a BMS connector for remote alarm monitoring.
